What is the district nursing service?

The service provides skilled nurses who are able to assess, plan and deliver care to patients.

The service operates seven days per week, 365 days per year and is accessible 24 hours per day.

Who is the service for?

The service provides nursing care to housebound patients.

The length of time you receive care will depend upon your needs.

The district nurse will identify with you when or if your condition means you can see a nurse in a treatment room.

This will help nurses be available for other housebound patients.

The district nurses work closely with your GP, other services, family members and carers to improve or maintain health and promote your independence.

What can you expect?

You can expect the district nurse to provide the following:

- An assessment of your nursing needs
- A plan of care that is agreed with you and your family or carer (if you wish), which will be revised as your condition changes
- Care that is delivered in a way that respects your privacy, dignity and maintains your confidentiality at all times
- Support and advice to you, your family and carers in relation to your ongoing treatment. This may include advice regarding referral to other services that may be able to help you

How to access the service?

You can contact your team via your GP or via the telephone numbers overleaf

How does this service help you?

The aim of the service is to provide an easily accessible and responsive service which meets your needs; to help you achieve pre-agreed goals and maximise your independence.

What treatments do we provide?

- Wound management
- Palliative and end of life care
- Advice and support with medication
- Catheterisation
- Nutritional advice and support
- Advice and support to prevent falls
- Advice and support on ear care
