Subject: Deaths investigated by the Coroner

## REQUEST

Re: Amount of deaths investigated by Coroner and amount legal cases against Whiston NHS Trust in last 3 years with current claims in progress

I would be most grateful if your Trust can provide accurate information as to how many families currently or have previously made a legal claim in respect of death to patients while in the care of your Trust and any relevant claims that have been paid out and also how many court cases over the last 3 years up to current date

This information is being used for research

## RESPONSE

There were 5 clinical negligence claims in respect of deaths to patients while in the care of the Trust investigated by the coroner in the last 3 years; four of these are ongoing and only one has been concluded.
