Subject: Type 2 diabetics

## REQUEST

I have tried emailing NHS England to see if they have any data on the number of type 2 diabetics on medication for the disease and what types of medications they are on, I was wondering if the trust has any data on this, as I didn't know who to contact I did this form on the website, I am a college student at Carmel College and was hoping to get any data on this to help with my EPQ.

I mainly wanted to know about metformin and how many patients are using it any other information on other medication would be great. Also, if there is any data on diets that patients are on that would be very helpful. Such as: amount of patients on the medication or diet

## RESPONSE

The Trust does not hold the information.
