Subject: Onsite incinerator

REQUEST & RESPONSE

I would like to know if the hospital has its own onsite incinerator and if it does, is it still used / how often is it used?

The hospital sites do not have their own on-site incinerator.

I would also like to know how the hospital's back up generator is powered, as in, what fuel is used?

The hospital sites back up generators are fuelled by 35 second oil/diesel.
