

Ref. No: 427  
From: Public  
Date: 02/03/23  
Subject: Menopause Clinics

## REQUEST & RESPONSE

- 1. Please provide me a list of menopause clinics that the Trust operates, including the address and postcode of the clinic.**

The Trust currently operates 4 menopause clinics. 1 for new patients first appointments and 3 for follow up appointments. They are all based at the St Helens Hospital site, Marshalls Cross Road, St Helens WA9 3DA. These clinics were created on 22/04/2022.

- 2. What is the mean waiting time between referral and appointment at a menopause clinic within the Trust area?**

The average wait in weeks (from referral date to appointment date) for 2022 was 38.3 and the average wait in weeks for 2023 is 37.8.

- 3. How many people are currently on the waiting list for a menopause clinic?**

There are currently 101 patients waiting for the specified clinics who have been assigned an appointment date.

Please note that a patient is only assigned to a clinic once a date has been given so there may be more people 'awaiting' those clinics but not yet assigned a date.

- 4. How many referrals have there been to menopause clinics each year since 2018? Please split the data by calendar year.**

We are unable to provide the number of referrals by clinic code alone.
