

Ref. No: 418  
From: Research  
Date: 28/02/23  
Subject: Digital Obstetric Sepsis Alerts

## REQUEST & RESPONSE

1. Does your Trust use an electronic health record system [EHR] (e.g., Cerner, System C, Dedalus)? Yes

- If YES, do sites within your Trust use different EHRs? No

2. Please name the EHR systems used at each Trust site.

System C Careflow

3. Does your Trust's site(s) also use EHRs for obstetric patients? Yes

- If YES, please name ALL EHR systems used for obstetric patients at each site, and when they were introduced?

System C Careflow Maternity – Go Live 27.02.13

4. Does your Trust's site(s) use an algorithm (e.g., MEWS, NEWS2, qSOFA) for the early detection of obstetric sepsis? Yes

- If YES, please provide details of the obstetric sepsis algorithm used in your Trust's site(s). Please attach details if possible.

418 - Action for  
Suspected Maternal

5. Does your Trust's site(s) use a digital sepsis alert for obstetric sepsis? No

- If YES, please specify ALL sites where the obstetric digital sepsis alert is active.

N/A

6. For sites with active obstetric digital sepsis alerts: please indicate the obstetric sepsis algorithm used in the digital sepsis alert.

N/A

7. How does the obstetric digital sepsis alert notify practitioners (e.g., a pager, a flashing warning on patients' EHR)?

N/A
