

Ref. No: 0261
Date: 18/09/23
Subject: Digital Test Results

REQUEST

Please can you answer the following questions regarding the sharing of test results with patients. If you are not currently sharing test results digitally, please state when you plan to start sharing.

1. Does your Trust share test results digitally with patients?
2. What system do patients use to access their test results digitally? (e.g. PKB, EPIC My chart, Other - please state)
3. Please list which hospital departments are sharing tests results digitally?
4. Which results (if any) are not automatically shared digitally with patients?
5. Do you delay sharing digital test results? Please state how long this delay is (7 days, 14 days, 21 days, 28 days, or longer).

RESPONSE

1. Does your Trust share test results digitally with patients?

Yes, although this is limited to select departments and not Trust wide.

2. What system do patients use to access their test results digitally? (e.g. PKB, EPIC My chart, Other - please state)

My Medical Record (MMR) – this system is used for cancer patients only in Urology and Colorectal, pre-malignant disease in Haematology.

INRStar – this system is used for anti-coagulation patients. Anti-Coagulation team calculate dosing advice and submit to app. Patient logs into app for results. No automatic sharing without nurse reviewing.

3. Please list which hospital departments are sharing tests results digitally?

Please refer to the response to question two.

4. Which results (if any) are not automatically shared digitally with patients?

Please refer to the response to question two.

5. Do you delay sharing digital test results? Please state how long this delay is (7 days, 14 days, 21 days, 28 days, or longer).

No
