

## Turning your instrument ON and OFF

### TO TURN ON

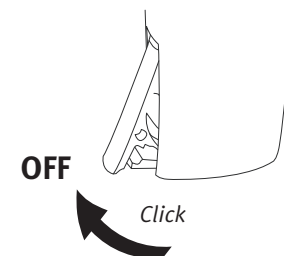

Close the battery door completely with the battery in place.  
The instrument will start up by playing a jingle.  
This shows that the battery is working and  
the instrument is operating.

### TO TURN OFF

Open the battery door slightly until a “click” is felt.

To preserve the battery, make sure your hearing instrument  
is switched off when you are not wearing it.

### IMPORTANT NOTICE

Open the battery compartment fully to allow air to circulate whenever you are not using your hearing instrument, especially at night!
