## Referral Process

Your local GP practice has referred you urgently to the Dermatology (skin specialist) service at Southport Hospital, part of Mersey & West Lancashire Teaching Hospitals NHS Trust (MWL), in order to seek a specialist opinion relating to your skin problem.

This information sheet is to explain how the service works and how you will be kept informed of the outcome.

### Your Primary Care Team will:

1. Take photographs of the problem area using a special camera microscope. Three pictures will be taken, including a close up.
2. Ask you to confirm your consent for images to be shared with the hospital.
3. Ask you a number of questions relating to your skin problem.
4. Ask you to confirm that you consent to the hospital arranging a referral for a face-to-face hospital appointment in the event the dermatologist believes this is needed in the form of a clinic appointment or minor operation appointment.
5. Securely upload images/relevant medical details to the dedicated computer system that has been contracted by the NHS to process your request.

Note: images/clinical information are securely encrypted and cannot be viewed by anyone except your GP/Nurse and the Hospital Medical Team who will be assessing your case.

## Review Process

### The Hospital Medical Team will:

1. Review your case within a maximum of ten days. Please note the team will triage as soon as possible so you may hear from them sooner and this should not be a cause for concern.
2. Send an opinion/outcome to your Primary Care Team via the dedicated computer system. You will also receive a copy electronically if you consent to this.
3. If the Dermatology Medical Team concludes a hospital appointment is required, they will arrange for the hospital administration team to contact you for an appointment in a dermatology clinic (e.g. for face-to-face review or to take a small skin sample (biopsy), or removal of the lesion).
4. If the Dermatology Medical Team concludes you do not need to visit the hospital, your GP will be informed of the recommended action. This could be no action required, a recommendation to undertake further investigations, or advice to provide specific treatment. A copy of the recommendations will also be sent to you by post.

Note: When you are contacted will depend on the priority allocated to your case after assessment of the photographs. In some cases, due to the location or size of a specific skin lesion the hospital dermatologist may recommend that another department would be best seeing you.
