Subject: Covid patients

REQUEST

I am writing to you to request information please in regards to what your hospital bed numbers were specifically for covid-19 patients in April 2020 compared to October 2020.

I would like to know - how many beds you had available and how many beds - over night were occupied by covid patients in the same time frame.

Looking at the fact you have 833 beds, could you also let me know how many of those beds are ICU and how many of those beds are currently today the 14th of October 2020 occupied specifically by COVID PATIENTS - both ICU and normal beds.

RESPONSE

The average number of G&A (General & Acute) beds available were:

April = 596
October = 712

The average number occupied with COVID positive patients were:

April = 117
October = 96

On 14th October, there were 725 available G&A beds (110 occupied by COVID positive patients). In addition, there were 14 available ITU beds (7 occupied by COVID positive patients). The total number of COVID positive patients was 117.
